

1) Which field of the Customers table is the primary key?

= Cnum is the primary key of the Customers table.

2) What is the 4th column of the Customers table?

=Rating is the 4th column of the Customers table.

3) What is another word for row? For column?

= Tuple, Entity, opportunity are another words for the row and Attribute and Method for Column.

4) Why isn't it possible to see the first five rows of a table?

= In multiuser Environment , if multiple user are inserting rows inside the same table simultaneously , if MySQL where to store the rows sequentially , it would be very slow.

When you INSERT into the table , wherever MySQL finds the free space in the DB server HD, it will store the row there.

When you SELECT from a table , the order of rows in the output depends on the row address in ascending order of row .

Therefore its not possible to the see the first 5 rows of a table.
